

PHP Procedure

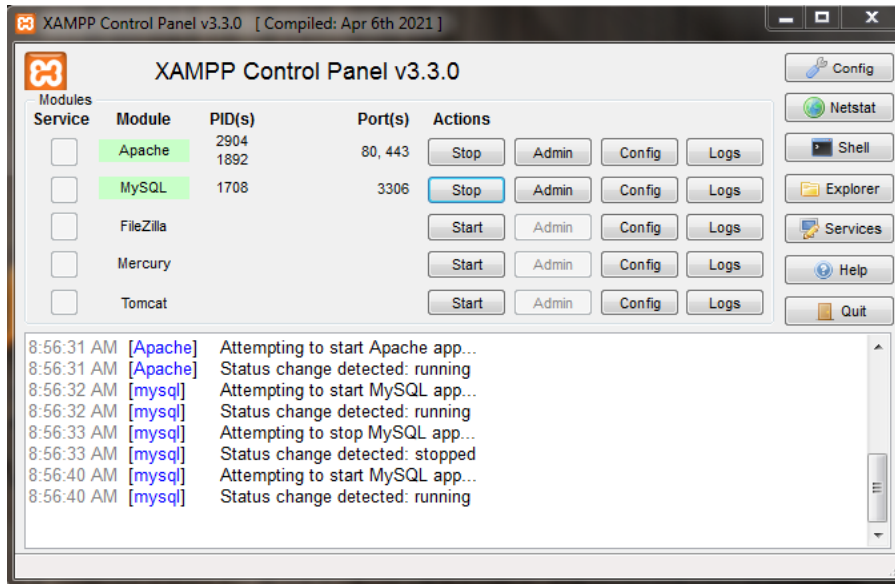

Step 1

To run PHP xampp software and chrome must be installed

Step 2

Now open xampp and click on start on Apache and Mysql

Step 3

Now go to C drive open xampp folder and open htdocs folder

In htdocs folder create a new folder and rename the new folder.

In that folder create program in notepad or in notepad++ and save as file(program name).php

Step 4

Open chrome and in address bar type localhost and then enter.

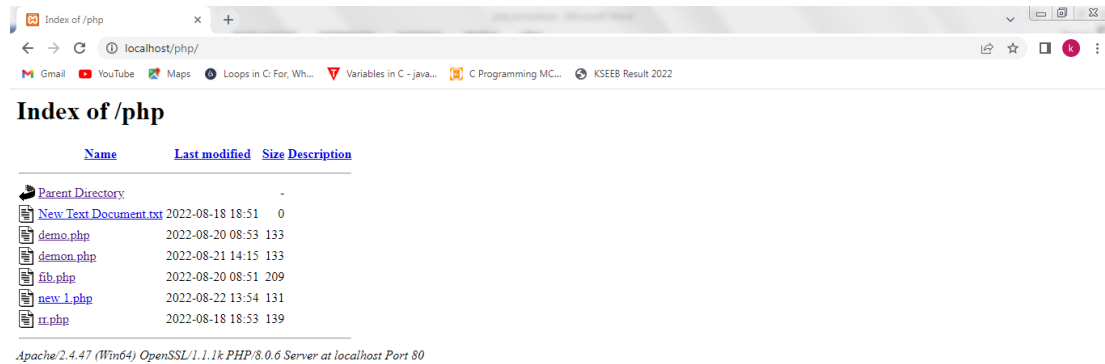

Step 5

Now in address bar **http://localhost/dashboard/**

Remove dashboard and type the folder name you have saved in htdocs

http://localhost/foldername

The screenshot shows a web browser window with the address bar displaying 'localhost/php/'. The page title is 'Index of /php'. Below the title, there is a table with columns 'Name', 'Last modified', 'Size', and 'Description'. The table lists several files and directories, including 'Parent Directory', 'New Text Document.txt', 'demo.php', 'demon.php', 'lib.php', 'new_1.php', and 'u.php'. At the bottom of the page, there is a footer that reads 'Apache/2.4.47 (Win64) OpenSSL/1.1.1k PHP/8.0.6 Server at localhost Port 80'.

Name	Last modified	Size	Description
Parent Directory	-	-	-
New Text Document.txt	2022-08-18 18:51	0	
demo.php	2022-08-20 08:53	133	
demon.php	2022-08-21 14:15	133	
lib.php	2022-08-20 08:51	209	
new_1.php	2022-08-22 13:54	131	
u.php	2022-08-18 18:53	139	

Apache/2.4.47 (Win64) OpenSSL/1.1.1k PHP/8.0.6 Server at localhost Port 80
